EFFORT TO DESTROY "DRY" ENFORCEMENT

Declares Wayne B. Wheeler About Move to Save "Medical Beer."

Washington, D. C., July 14.—Declaring that "the 11th hour rally in the Senate to save medical beer as a substitute for booze shows the purpose of the opposition to destroy prohibition enforcement," Wayne B. Wheeler, general counsel of the Anti-Saloon league, in a statement to-day said:

"The proposed law limiting prescription of alcohol to physicians is a protection to that large per cent of the medical profession who are true to their ideals."

"Medical beer," the statement said, "is not recognized in the medical profession or in the prohibition laws of the states" and the proposed law "penalizes only the guilty."

CONFIDENT OF COOPERATION

By United States in Opening Up St. Lawrence River.

Montreal, July 14.—Confidence that the United States would join with Canada in opening the St. Lawrence river to deep sea vessels as a part of a deep water war from the Great Lakes to the Atlantic was voiced by United States Senator Townsend of Michigan at a reception tendered the party touring the route of the proposed waterway to-day.

The senator said he felt sure the report of the joint commission that spent 18 months investigating the feasibility of the project would be favorable and that it would meet the approval of Congress.

Possibilities of power development, Senator Townsend said, were of great importance as development of a waterway and revenue derived from sale of the power, he believed, would pay for the project.

The waterway could be built, he declared, without taking a dollar from the United States treasury.

The party, including members of the Great Lakes-St. Lawrence Tidewater association, reached Montreal early to-day by steamer.

The nationalists are retreating to strong positions in the northwest of Eski-Shehr and southwest of Kutais, the statement adds.
